

A Note on Molina's Willingness to Accept a Grievance:

The Molina webform, when filled in, at the then-time valid url:

<https://www.molinahealthcare.com/marketplace/tx/en-us/Members/Members-Resources/-/media/4BF316BC6AFF4D07AF3939094100FE39.ashx>

would NOT PRINT OUT anything filled in, in its form fields. Nothing. Not one filled in field.

Moreover, the Website Feedback link, at :

<https://www.molinahealthcare.com/members/wa/en-US/mem/medicaid/contact-us/contact-us.aspx>

refused to take this feedback. *"We can't take your feedback now."*

It stuck its figurative tongue out. Nope: Trying back later, on several different days and times of day, didn't yield any better results.

The Specific Issues which the Molina Webform Refused to Duly Print Out:

Ongoing FRAUD on my good name, hand in hand with deprivation of the Right to Honest Services, as part of a world wide financial fraud, making me its unwilling linchpin.

I still don't get care for my health, at any clinic or hospital to which I go, under not merely Molina, but ANY insurer.

The particular matter detailed in the subsequent pages to this one, describe FRAUD directed at my legitimate use of the Molina MyChoice Card.

And then, because the relevant Molina form emphasized telephone contact, I added:
Reach this Member via email at: [provided]

~~~~~

### Want to Try to Resolve an Issue? You Must Call:

It is disturbing, that an organization obligated to obey HIPPA law, demands the use of a phone, in order to attempt to resolve matters with them. Phone use welcomes hackers.  
See –

Selective Conduct re Tel Svc:

[https://drive.google.com/drive/folders/17-qAtcJrbm7Nx\\_3LNbhaFr4rR3oy5Qjz?usp=share\\_link](https://drive.google.com/drive/folders/17-qAtcJrbm7Nx_3LNbhaFr4rR3oy5Qjz?usp=share_link)  
or

[https://ia601707.us.archive.org/view\\_archive.php?archive=/11/items/selective-conduct-re-tel-svc/Selective%20Conduct%20re\\_%20Tel%20Svc.zip](https://ia601707.us.archive.org/view_archive.php?archive=/11/items/selective-conduct-re-tel-svc/Selective%20Conduct%20re_%20Tel%20Svc.zip)

One can easily see how financial fraudsters would want to hack a phone, and any conversations relevant to advancing their fraud. It would make sense, that they would influence an organization to demand one use a phone, to contact that organization.

No: They wouldn't want the organization to allow use of email to contact them. Email is Forwardable. Provable. It readily refutes false allegations of, "*Golly gee, we never got this.*"

Molina solely provides an email address for civil rights complaints. That is relevant here, due to Complainant's age, gender, and race. But what if it weren't?

What about logging onto the Molina website? As with prior years, the Molina site persists in refusing to accept my accurate logons. This is SELECTIVE site conduct. The site does accept the logons of members not subjected to financial fraud.

Nevertheless, a major reason for the ever ongoing Fraud, is WhistleBlower Retaliation (WB-R). The WB-R continues to persist, over an original incident of Deliberate, Sadistic, Malpractice, enabled and made worse, via ever ongoing, Tampered Communications (furtive false comms behind my back). See –

What Some Hospital[s] Clinics Insurers got away with

[https://drive.google.com/drive/folders/1Fun0ugePrXCbM0qtAgIVzswkSw50i3QE?usp=share\\_link](https://drive.google.com/drive/folders/1Fun0ugePrXCbM0qtAgIVzswkSw50i3QE?usp=share_link)

None of the grave matters raised in documentation at the above link have ever been fixed, and the WB-R for having proven them, persists at every outlet I go to, in any state, anywhere. So: I can't get healthcare. BECAUSE I'm covered. I've even tried paying out of pocket. That STILL resulted in no care, implied threats to cry wolf, and fraudulent billing and paying, (double dipping) via the state's insurance system.

No care.

~~~~~

Early in the year 2025, a Claudia Meyers with Molina, intercepted to ensure I would not get a promised benefit (a Care Team Meeting at my residence.). See the relevant email Thread, and listen to the relevant conversation, as follows.

05-19-25 – Claudia Thread:

<https://ia601507.us.archive.org/20/items/05-19-25-claudia-thread/05-19-25%20-%20Claudia%20Thread.pdf>

Molina's refusal to be responsive persists, in late 2025. See –

Contacting Molina No Work:

<https://dn720309.ca.archive.org/0/items/contacting-mol-no-work/Contacting%20Mol%20No%20Work.pdf>

So those are the prevailing attitudes toward accepting a Grievance, responding directly to this member about even a non-grievance matter, and toward inventing fraud-inviting restrictions, (you must - - - call - - -) to prevent this member trying diligently to fix any matter.

To put the ongoing fraud via the Molina MyChoice insurer Debit Card (Card) into further perspective, next is a brief background, for the year 2025.

Year 2025 Background:

One Molina employee inserted herself between me and a good Molina employee, to outright Lie within my Molina Care Plan, in writing. Other than my name and contact info, they lied about pretty much everything else, in it. They then deprived me of any portion whatsoever, of every service (benefit) for which I was eligible, other than the Card, and for the entire year, of 2025.

They particularly outright refused interviews or meetings of any type whatsoever, at my residence. So apparently, they had further lied that I didn't have one. And that particular lie, appeared to be a key lie, to engage the punitive prejudices of those who feel a misplaced arrogant sense of entitlement to prey upon anyone so devastated by crime, as to be in that condition. Yes: A false sense of entitlement to get fraudulent funds, while depriving the injured, of the Right to Honest Services. Humm. What about the character of those who so lie? And keep it up. For over a decade? And fraudulently bill and get fraudulently paid in state funds? Year after year? And ongoing?

I Peter 5:8 “... *The devil prowls about like a roaring lion, seeking whom he may devour.*”

Why would a lion, or anyone like the devil, have any curiosity, about how an antelope became injured? Just pounce!

Get caught pouncing? Just keep the lies and fraud going! The state has had, and continues to get, endless funds, and has shown it has no inclination to prosecute fraudsters who commit crimes against Complainant.

Just one problem. If there is even merely one, overwhelming, refuting fact; then it doesn't matter how many people enter into a pact to co-lie the same lie. For example: 20 million people all claim Jim killed Joe. But Joe is alive. Those 20 million may have gloated that they could get away with framing Jim. But the only thing they proved, is that they co-lied.

You may just find several; not merely one, overwhelming, refuting, facts (plural), to what is claimed by those who ignore, or seek to get you not to address the matters raised in, Complainant's burdened to be ever ongoing, for more than a decade, Complaints. If so, demand to find out the motives of any liar. Not further piles of rationalization: Motives.

Not unsubstantiated mere stances, not believed by their (usually imperious, vehement) adopters: Motives.

Suspicion: Do they need to badmouth, in order to keep their hides out of jail, for crimes of which they are guilty?

That would explain imperious vehemence, unbacked by evidence.

I'll try to put the no residence, so therefore, break the law, Lie, into perspective. You the reader, are not burdened to have to display your residence address publicly, to offset lies which result in ongoing crimes against you. You are not targeted by world wide financial fraud, making you its unwilling linchpin. You aren't subjected to governmental bodies falsifying their internal records, to lie, about your residence, at points in time after you repeatedly provided proof of it, to them. Then, deliberately keeping up that knowing falsification, until world wide society at large, refuted it – only because you were compelled wrongly, to divulge it to all, everywhere.

Imagine if you were. Imagine if you then had to let everyone everywhere, know your residence address. Should those imperiously compelling such divulging, get off the hook?

Next, consider those whom imperious, mere stance taking (not believing) liars, manage to dupe into going along with the liar's criminal efforts. Some of those duped, will never change their minds. Even when presented with new evidence. You'll have to deal with that sector, of humanity. So be prepared to do so, as evidence won't get through to them. See –

Don't confuse me with the facts:

[https://ia904509.us.archive.org/14/items/dont-confuse-me-w-the-facts/
Dont%20Confuse%20me%20w%20the%20Facts.pdf](https://ia904509.us.archive.org/14/items/dont-confuse-me-w-the-facts/Dont%20Confuse%20me%20w%20the%20Facts.pdf)

So how about a recent contact effort, which bypassed having to - - - Call - - - and, was furthermore, a Reply to a message invitation which came directly from someone with Molina? Nope: Replying even to that, didn't work. I never heard a pip squeak back. See the, "*Contacting Molina No Work*," Thread, at an url previously provided in this doc.

So what about the Card?

Fraudsters Defrauded Complainant every month throughout 2025, in every single purchase Try, use of the Card, with the exception of one purchase Try in the month of October. They siphoned, during the months in which they deigned to allow me to use it at all. Frequently, they alternated months, such that they deprived me of absolutely any value from it, every other month. And remember, they siphoned out such as to subject me to too low

ceilings, on the months fraudsters deigned to allow any value to me, from it. No: They never carried over any balance, on the Card, to a subsequent month. That's not merely the amounts they siphoned, use to use. No. That is the per that month, balance above the siphoned amount; plus, the purchase amount; together. Even that dramatically and wrongfully smaller, balance, was never carried over. Not once.

Any one incident of fraud or theft, (in this case, Siphoning), may amount to a misdemeanor. But their accumulated total, may come to a felony. These incidents are ever ongoing. So their accumulation, persists.

Fraudsters outright quit sending me any mail orders using the Card, after merely one or two. Apparently, a residential delivery address was getting in the way of their key, among many, lies, that I had no residence. That appears to be one of the lies they've kept up for over a decade, defrauding me, and thereby, public funds intended to - - - well, provide healthcare.

They deliberately demanded that one - - - CALL - - - to attempt to sort out their fraud efforts, disguised as ineptitude, mere error, or confusion. They took up a bit over 4 hours on the phone, with multiple transfers and calls, on a single incident of a single issue, and of course, never resolved it. Transfers, of course, violate HIPPA.

Fraudsters followed up, refusing to use the agreed upon means, made directly with me during that 4+ hours, to contact me directly. This tactic is predicated upon a group criminal pact, to co-lie a same lie, regarding the Why behind their deliberate outright belligerent, refusal to interact directly with this Molina member. Yes: Directly. No middlemen. They won't do it. Try to get them to. I dare you. They'll go to jail, before they do that.

And they won't prove any lie they try, to compel that belligerence about their refusing direct contact with me. (The mere mass-Send, to invite to a DSNP Member Advisory Committee meeting, doesn't count. The refusal to reply to Complainant individually, does.)

Moreover, you've probably already come across overwhelming refutations to any such lies. Along with the no residence lie, this additional *"Don't Contact this Member Directly Because ..."* lie, appears to be a key lie, in advancing world wide financial fraud on Complainant's good name, and making Complainant its unwilling linchpin.

Instead of duly making direct contact using the means directly agreed upon with me – yes – in a direct conversation on a then-time helper's phone, – they slithered around behind my back, and later made a separate, direct, call to that helper. This was something both I and the helper had told them not to do, and, the helper never provided their own phone number. They were solely to use the means I gave them, to reach me, alone, directly. In that separate call, they criminally solicited the caller who had tried to help, using their own phone, so I could speak per Molina's demand of - - - CALLS - - - ONLY. They solicited that caller to participate with them, in their ID Theft and Fraud efforts, targeting this Complainant. And to conceal their (criminal solicitor Molina employee's,) ID, from this Member.

Want evidence of any of this background? Request it from Complainant, and I'll inundate you with it.

So What Happened with the Card in 2025?

For a recent example of an incident of back end tech and security folks committing fraud against this member, on the Card, see –

12-11-2025 – Purch Try MyCh:
<https://dn720005.ca.archive.org/0/items/12-11-2025-purch-try-my-ch/12-11-2025%20-%20Purch%20Try%20MyCh.pdf>

A subsequent purchase Try in December, on the Card, showed that no amount whatsoever, would be paid for, via the Card. It outright rejected making any payment at all. Then? The cash register failed to duly dispense a receipt, showing that failure. Yet the cash registers there, had dispensed, “*We Aren’t Paying*” receipts, in the past, on the occasions when the Card had failed to pay.

See also, a few Criminal Complaints already provided elsewhere, about some of Complainant’s additional experiences, in trying to use the Card, in 2025. Again and again, there were persisting fraud efforts. Some of the tactics may have changed, from use Try to use Try. But the overall Fraud efforts, persisted, and continue to persist. Click on and go through, the items in the list shown here –

Even trying to purchase a money order, or make a routine, ordinary shopping purchase of any type, fits into the category of world wide financial fraud efforts, targeting this Complainant. See merely a few examples, next. You may ask Complainant for further examples, and I'll provide them.

Contrast this construct, with your own experience. You can make routine, ordinary purchases, without having to record what you do (I presume). Cashiers don't try to defraud you, frame you, and then threaten to cry wolf against you, Self check-out registers don't misbehave. You get receipts, no problem. Once upon a time, I, too, used to take being able to make ordinary purchases, without being burdened to have to document every aspect of them, for granted. No longer.

Summary:

The multiple fraud incidents on the Card, fit into this overall world wide financial fraud scheme, targeting this member, and forcing this member to be an unwilling linchpin of that fraud. The accumulated totality of fraud incidents amount to a felony racket. As with the multiple other fraudsters, the Card fraudsters need to be held accountable. Any health insurer providing the Card as a covered benefit, needs to take the helm, in ensuring these fraudsters face prosecution. Not anemic slow walking. Not getting off the hook completely, as they currently are. Prosecution.
